

## HOW TO CREATE A CLASS?

### EUROPEAN FILM FACTORY

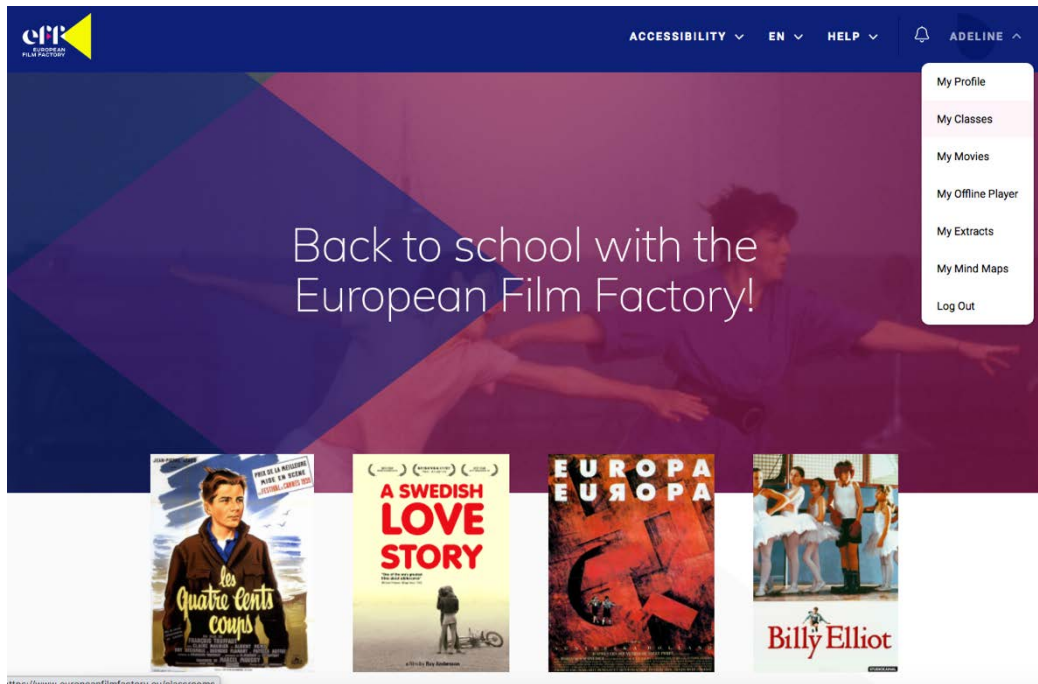

On European Film Factory, teachers and students can have an account! However, students can create an account only with your help.

For your students to create a European Film factory account, you must create a class and give your student the class code. This code allows the students to create an account without giving their email address and it allows the European Film Factory to protect their personal data.

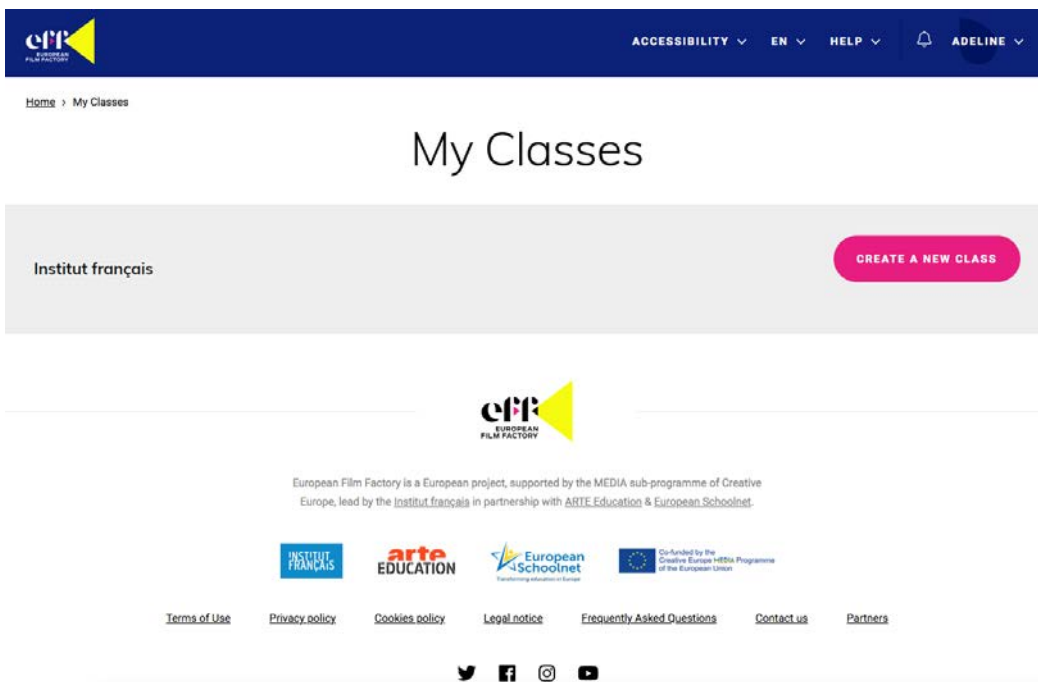

The screenshot shows the login page of the European Film Factory website. At the top left, there is a '< BACK' link. In the center, the European Film Factory logo is displayed. To the right, there are links for 'ACCESSIBILITY' and 'EN'. The main heading is 'Log in'. Below this, there is a login form with two input fields: 'Email or European Film Factory username' and 'Password'. A link for 'Forgotten password?' is located to the right of the password field. Below the form is a 'CONTINUE' button. At the bottom of the page, there is a link: 'Don't have an account yet? Sign up for free'.

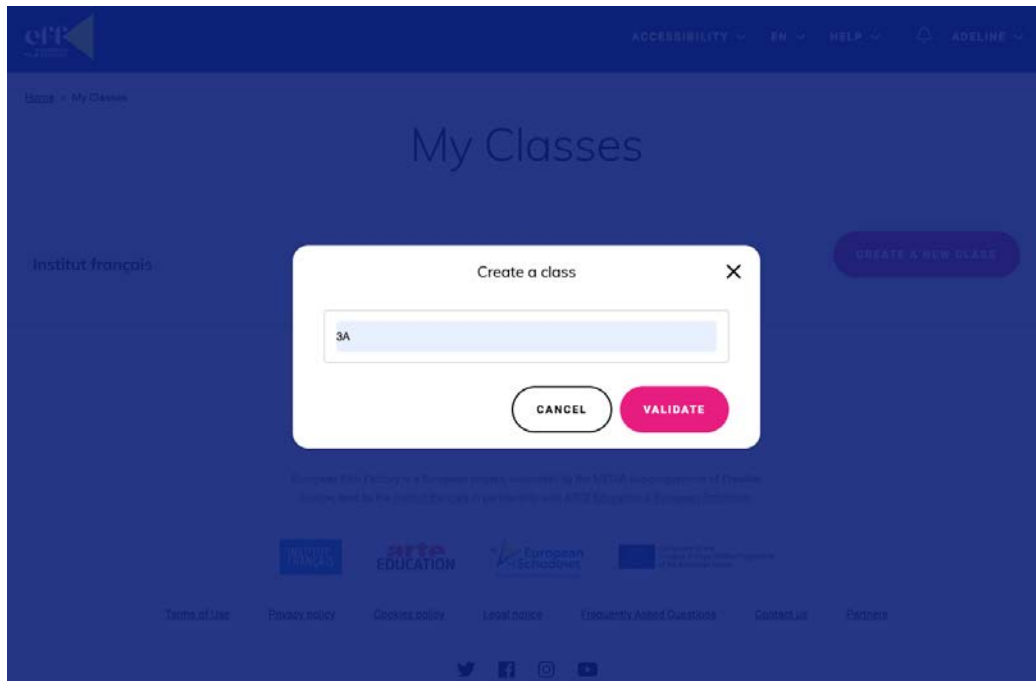

First, you have to log in.

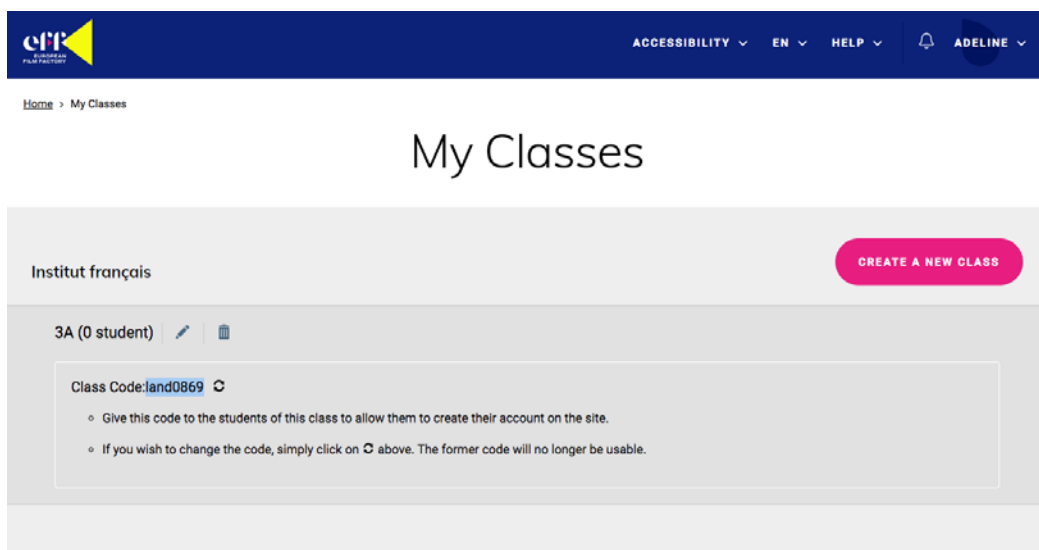

You can go on your Profile page, click onto My Classes.

You can then create your class,

You can give it a name and validate it.

There, you will find your class code.  
You now have to give it to your students so they can create their own account and join your class.
